Mission statement: The goal of *Neuro-Oncology* is to provide the international neuro-oncology community with high-quality, rapid publication of information in all fields. The journal welcomes submissions from throughout the world and encourages the participation of neuro-oncologists in a wide array of subspecialties. Areas covered include, but are not limited to, biochemistry and biophysics, clinical neuro-oncology, clinical therapy trials, epidemiology, imaging, immunology, medical neuro-oncology, neuropathology, molecular genetics, pediatric neuro-oncology, preclinical experimental therapeutics, retrospective clinical studies, surgical neuro-oncology, and tumor biology. Published by Oxford University Press, *Neuro-Oncology* is the official journal for the Society for Neuro-Oncology (SNO), the Japan Society for Neuro-Oncology, the European Association for Neuro-Oncology, and the World Federation of Neuro-Oncology Societies.

**Volume 14 | Number 6 | June 2012**

**Editorial**

*The value of cell line validation*

W.K. Alfred Yung 675

**Letters to the Editor**

*In Regard to Lassman et al.*

Eduardo Weltman and Suzana Maria Fleury Malheiros 676

*Response to Weltman and Fleury Malheiros, re Lassman et al.*

**Review**

*Caveolin-1, caveolae, and glioblastoma*

Marie-Odile Parat and Gregory J. Riggins 679

**Basic and Translational Investigations**

*MicroRNAs in cerebrospinal fluid identify glioblastoma and metastatic brain cancers and reflect disease activity*

Nadiya M. Teplyuk, Brit Mollenhauer, Galina Gabriely, Alf Giese, Ella Kim, Michael Smolsky, Ryan Y. Kim, Marlon G. Saria, Sandra Pastorino, Santosh Kesari, and Anna M. Krichevsky 689

*DNA fingerprinting of glioma cell lines and considerations on similarity measurements*

Pierre Bady, Annie-Claire Dissersen, Vincent Castella, Stefanie Kalt, Karl Heinimann, Marie-France Hamou, Mauro Delorenzi, and Monika E. Hegi 702

*mIR-181d: a predictive glioblastoma biomarker that downregulates MGMT expression*

Wei Zhang, Jing Zhang, Katherine Hoadley, Deepa Kushwaha, Valya Ramakrishnan, Shouwei Li, Chunjia Li, Yongping You, Chuanlu Jiang, Sonya Wei Song, Tao Jiang, and Clark C. Chen 718

*Quantification, self-renewal, and genetic tracing of FL1+ tumor-initiating cells in a large cohort of human gliomas*

Virginie Clément-Schatlo, Denis Marino, Karim Burkhart, Patrick Teta, Fabienne Levyvraz, Bawaran Schatlo, Stephan Frank, Karl Schaller, Vincent Castella, and Ivan Radovanovic 720

*Telomere maintenance mechanisms in malignant peripheral nerve sheath tumors: expression and prognostic relevance*

Lorenza Venturini, Maria Grazia Daidone, Rosita Motta, Graziella Cimino-Reale, Stacey F. Hoare, Alessandro Gronchi, Marco Folini, William Nicol Keith, and Nadia Zaffaroni 736

*uPAR and cathepsin B inhibition enhanced radiation-induced apoptosis in glioma Initiating cells*

Rama Rao Malla, Sreealatha Gopinath, Kiranmai Alapat, Bharathi Gorantla, Christopher S. Gondi, and Jasti S. Rao 745

**Clinical Investigations**

*Initial treatment patterns over time for anaplastic oligodendrogial tumors*

*Outcomes of hospitalization in pregnant women with CNS neoplasms: a population-based study*

Anna R. Terry, Fred G. Barkerli, Lisa Leffert, Brian T. Bateman, Irene Souter, and Scott R. Plotkin 768

*Interplay among BRAF, p16, p53, and MIB1 in pediatric low-grade gliomas*

Craig Horbinski, Marina N. Nikiforova, Jill M. Hagenkord, Ronald L. Hamilton, and Ian F. Pollack 777

*Visual outcomes in children with neurofibromatosis type 1-associated optic pathway glioma following chemotherapy: a multicenter retrospective analysis*

Radiotherapy and temozolomide in anaplastic astrocytoma: a retrospective multicenter study by the Central Nervous System Study Group of AIRO (Italian Association of Radiation Oncology)
Silvia Scoccianti, Stefano Maria Magrini, Umberto Ricardi, Beatrice Detti, Marco Krengli, Salvatore Parisi, Filippo Bertoni, Guido Sotti, Samantha Cipressi, Vincenzo Tombolini, Stefano Dall’Oglio, Marco Lioce, Calogero Saieva, Michela Buglione, Cristina Mantovani, Giovanni Rubino, Paolo Muto, Vincenzo Fusco, Laura Fariselli, Costantino de Renzis, Laura Masini, Riccardo Santoni, Luigi Pirtoli, and Giampaolo Biti

Early measures of cognitive function predict survival in patients with newly diagnosed glioblastoma
Derek R. Johnson, Allison M. Sawyer, Christina A. Meyers, Brian Patrick O’Neill, and Jeffrey S. Wefel
