**Monday, July 21, 2014**

Temporal and Spacial Evolution of Clones in 400 Low Grade Gliomas in Japan .......................................................... iii1
Atsushi Natsume

Genetic Changes in Radiation-Associated Meningioma .......................................................................................................... iii1
Elizabeth Claus

Mutation-Based Molecular Glioma Classification: Prevalence and Association with Germline Risk SNPS .................................. iii1
Dan LaChance

Telomere Length Variants are Associated with High-Grade Glioma Risk: Identification of a Novel Glioma Risk Locus by Genome-Wide Association Study ............................................................ iii2
Kyle Walsh

Tree derived Survival Risk Groups in Differentiating Risk for Glioma Patients ................................................................. iii2
Annette Molinaro

A New Clinical Guideline (2007) and National Awareness Campaign (2011) Accelerated Brain Tumour Diagnosis in UK Children (HeadSmart - Be Brain Tumour Aware) ......................................................... iii2
David Walker

Single Nucleotide Polymorphisms (SNPs) Associated with Glioma Survival ......................................................................... iii2
Margaret Wrensch

Initial Symptoms of Pineal Region Tumors - Comparison to Historical Control of Pre-CT Era ...................................................... iii3
Takamitsu Fujimaki

Incidence and Outcomes in Gliomas from Brain Tumor Registry of Japan 2001- 2004 ................................................................ iii3
Yoshitaka Narita

The p53 Pathway and Ancestral Progenitors are Associated with Tumor Recurrence in Glioblastoma ........................................ iii3
Roel Verhaak

Integrative Genomic Characterization of Lower Grade Gliomas ............................................................................................... iii3
Dan Brat

Modeling High MYC Medulloblastoma and Other Brain Tumors Using Human Neural Stem Cells........................................... iii4
Charles Eberhart

Next-generation Neuropathology - Improving Diagnostic Accuracy for Brain Tumors Using DNA Methylation Array-based Molecular Profiling .................................................................................... iii4
David Jones

Prognostic and Predictive Biomarker-based Subgroups in the NOA-04 Trial ........................................................................... iii4
Wolfgang Wick

MIF-CD74 Guided Therapeutic Strategy for the Upfront Treatment of GBM Patients with an Unmethylated MGMT Promoter ........ iii4
Kerrie McDonald

Sox2 Identifies the Treatment-Refractory Stem Cell Population in Group 2 Medulloblastoma ..................................................... iii5
Sheila Singh

Molecular-based Grading in IDH-Mutant Lower Grade Gliomas ............................................................................................... iii5
Ken Aldape

TERT Promoter Mutations Occur Frequently in Gliomas and a Subset of Tumors Derived from Cells with Low Rates of Self-renewal ........................................................................................................ iii5
Hai Yan

"Go or Grow" - Links Between Cellular Function, Glucose Metabolism and Glioma Microenvironment .................................... iii6
Katrine Lamszus

Distinct Copy Number Alterations and Incidence of Chromothripsis Associated with Grade and Prognosis in IDH Mutant and Wild-Type Gliomas ............................................................................ iii6
Howard Colman

Mutant IDH1 Suppresses Apoptosis Regulator Par-4 in Gliomas ............................................................................................... iii6
Craig Horbinski
CDKN2A Loss is Associated with Shortened Survival in Infiltrating Astrocytomas but not Oligodendrogliomas or Mixed Oligoastrocytomas
Arie Perry

Complex Evolutionary Dynamics Generates Genetic Diversity and Intra-Tumor Heterogeneity in Individual Patients with Glioblastoma
Colin Watts

Detection of Circulating Tumor DNA in Early and Late Stage Human Malignancies
Chetan Bettegowda

Novel Approach to Model Brain Tumours by Inducing Locally Restricted and Stem Cell Selective Gene Targeting
Sebastian Brandner

Genetic and Epigenetic Deregulation are Associated with the Aberrant Expression of a Stem Cell Related HOX Gene Signature in Glioblastoma
Monika Hegi

Cytomegalovirus Contributes to Glioblastoma in the Context of Tumor Suppressor Mutations
Nino Chiocca

The Treatment-Resistant Mesenchymal Signature in Glioblastoma Derives from Tumor Cells Independent of Stroma
Erik Sulman

Identification of Patients with Recurrent GBM that Benefit from Bevacizumab
Pim French

Astrocytic Tumors with Gain on 7q and Those with Gain of Whole Chromosome 7 Belong to Distinct Subgroups Characterized by Various Genetic Factors Including IDH1 and TP53
Yuichi Hirose

Interplay of Lipid Droplets and Autophagy Regulates Glioblastoma Survival
Deliang Guo

Vasculogenesis in von Hippel-Lindau Disease-Associated Tumors
Russell Lonser

Frequent H3F3A K27M Mutations in Thalamic Gliomas from Young Adult Patients
Akitake Mukasa

Image Guided RNA-seq Reveals Subtype-Specific Patterns at the Infiltrative Margins of Glioblastoma
Peter Canoll

Annexin A2 Regulates Angiogenesis and Invasion Phenotypes of Malignant Glioma
Tomotsugu Ichikawa

Intraoperative Contrast Enhanced Ultrasound in Brain Tumor Surgery
Francesco Dimeco

Novel Alkylphosphocholine Analogs for Broad Spectrum Cancer Imaging and Therapy
John Kuo

Information-Guided Surgery Using Intraoperative MRI and Functional Mapping for Gliomas
Yoshihiro Muragaki

In situ Metabolic Profiling Sheds Light on Oxidative Stress Pathways in IDH1 Mutant Oligodendroglioma
Simone Niclou

Immune Checkpoint Blockade for Glioblastoma: Preclinical Activity of Single Agent and Combinatorial Therapy
David Reardon

Metabolic Imaging Biomarkers for Mutant IDH1 Gliomas
Sabrina Ronen

Increased Perfusion due to Vascular Normalization Improves Oxygenation and Survival in Glioblastoma Patients Treated with Cediranib with or without Chemoradiation
Tracy Batchelor

Imaging Biomarkers of Malignant Progression of Diffuse Low Grade Glioma (LGG)
Susan Chang

Ex vivo Metabolic Signatures of Gliomas Based upon Tumor Grade, Imaging Characteristics and Treatment History
Sarah Nelson

Prognostic value of O-[2-18F]fluorethyl]-L-tyrosine Positron Emission Tomography (18FET-PET) within the Clinical Course in Newly Diagnosed Glioblastoma
Joerg Tonn
A Phase I Study of Convection-Enhanced Delivery of Liposomal-Irinotecan Using Real-Time Imaging With Gadolinium in Patients With Recurrent High Grade Glioma
Nicholas Butowski

Preoperative Dynamic Contrast-Enhanced MRI Correlates with Molecular Markers of Hypoxia and Vascularity in Specific Areas of Intratumoral Microenvironment and is Predictive of Patient Outcome
Randy Jensen

Real-Time Atlas-Based Stereotactic Neuronavigation
Sujit Prabhu

Brain Tumor Surgery Navigation System Based on Updating Preoperative Images Using Positional Information of Surgical Tools
Toshihiko Wakabayashi

Glioblastoma Stem Cell-Derived Pericytes and Tumor Angiogenesis
Shideng Bao

Single Cell Derived Clonal Analysis of Human Glioblastoma Links Functional and Genomic Heterogeneity
Peter Dirks

Mutant EGFR Suppression of MicroRNA-9 Induces FOXP1 to Enhance Glioblastoma Tumorigenicity
Frank Furnari

Presence of a Distinctive Myeloid Population is Associated with the Invasive Tumor Phenotype Observed after Anti-Angiogenesis Therapies
Candelaria Gomez-Manzano

Epigenetic Regulation of GBM Cell Stemness and Tumor Propagating Capacity by Oct4 and Sox2
John Laterra

Moving beyond VEGF: Inhibiting Glioma Angiogenesis by Targeting the TIE2/Angiopoietin Signaling Pathway
Karl Plate

Target Identification in Glioma Initiating Cells
Jeremy Rich

C11orf95-RELA Fusions Drive Oncogenic NF-kB Signaling in Ependymoma
David Ellison

Epigenome Alterations Define Lethal CIMP Positive Ependymomas of Infancy
Michael Taylor

Understanding and Tackling the Tumor-Immune Cell Dialogue During Progression and Therapeutic Resistance
Gabrielle Bergers

EGFR Phosphorylation of DCBLD2 Recruits TRAF6 and Stimulates Akt-Promoted Tumorigenesis
Shiyuan Cheng

Development of Novel Small Molecules that Target Glioblastoma Stem Cells
Santosh Kesari

Integration of Cancer Stem Cell Maintenance and Lipid Metabolism by Scavenger Receptors
Justin Lathia

Distinct and Separable Roles for Histone Methyltransferase EZH2 in Neurogenic Astrocytes
Daniel Lim

A Novel Polycomb Feed Forward Loop in Glioblastoma Multiforme
Silvia Marino

Extracellular Regulators of Glioblastoma Signaling
Joanna Phillips

Molecular Motors as Novel Targets to Block Glioma Dispersion and Proliferation
Steve Rosenfeld

Cell Intrinsic Sexual Dimorphism in the Rb and P21 Pathways Underlies Male Predominance in GBM
Josh Rubin

Integrated Analysis Identifies Different Metabolic Signatures within Both Tumor-Initiating Cells and Stem Cells in a Murine Glioblastoma Model
Oltea Sampetrean

Glioma Stem Cell Homing to the Human Subventricular Zone
Nader Sanai

A Novel p53 Bystander Effect Induces Glioblastoma Cell Death Through a Glycosylation-Dependent Mechanism
Erwin Van Meir
Aberrant Splicing of a Brain-Enriched Alternative Exon Eliminates Tumor Suppressor Function and Promotes Oncogene Function During Brain Tumorigenesis

Markus Bredel

Combined Drug Screening and Phosphoproteomics Identifies Candidate Brain Tumor Therapeutics and Novel Targets in Primary Human Brain Tumor-Initiating Cells

David Kaplan

The Warburg Effect and Beyond

Zhimin Lu

HuR Dependent Regulation of Centrosomes

Burt Nabors

Epigenetically Disturbed Neural Stem/Progenitor Cells in the Pre-Neoplastic Stage of PDGF-Induced Mouse Glioma

Monica Nister

Stem- and Progenitor-Like Cell Contribution to Malignant Astrocytoma Heterogeneity

Claudia Petritsch

Procoagulant Tissue Factor Expression is Linked to Distinct Subtypes in Glioblastoma and Plays a Role in Tumor Dormancy

Janusz Rak

Mechanisms of Adaptive Radioprotection in Glioma Stem Cells

Hideyuki Saya

Inhibiting Invasion and Stemness in Glioblastoma by Thymosin Beta 4 Gene Silencing: a Potential Therapeutic Target?

Ghazaleh Tabatabai

Function of Ecotropic Viral Integration Site 1 (EVI1) Gene in Mouse Neural Precursor Cells and Human Glioma Initiating Cells

Hideho Takeshima

Tuesday, July 22, 2014

Phase I Individual Dose Titration Trial of the Human Corticotropin-Releasing Factor (HCRF) Corticorelin Acetate Injection (XERECEPT) in Pediatric Patients with Peritumoral Edema of the Brain

Stewart Goldman

Whole Exome Sequencing Identified that the MAPK and PI3K Pathways are the Main Targets for Mutations in Intracranial Germ Cell Tumors

Koichi Ichimura

Molecular (Re-)Classification of CNS-primitive Neuroectodermal Tumors

Marcel Kool

Structural Variants Shuffle Chromatin to Activate

Paul Northcott

Assessing the Utility of Clinical Tumor Sequencing in the Pediatric Neuro-Oncology Clinic

William Parsons

INFORMing Treatment Decisions in Relapsed Pediatric Malignancies Using Next-Generation Diagnostics

Stephan Pfister

Prognostic Significance of Clinical, Histopathological, and Molecular Characteristics of Medulloblastomas in the Prospective HIT2000 Multicenter Clinical Trial Cohort

Torsten Pietsch

ABC2 and MDR Promote Brainstem Gliomagenesis and Limit the Efficacy of Dasatinib in a Diffuse Intrinsic Pontine Glioma (DIPG) Mouse Model

Oren Becher

Epigenetic Targeting of Hedgehog Pathway Transcriptional Output

Jae Cho

Transcriptional Regulation of Oligodendroglial Cell Fate by DLX Homeobox Genes: Potential Relevance to Histone H3.3 Mutations in Pediatric High Grade Glioma

David Eisenstat

PID1 is a Novel Sensitizer of Brain Tumor Cells to Chemotherapy

Anat Erdreich-Epstein

Preliminary Results of a Prospective Feasibility Pilot Study of “GEMPOX” (Gemcitabine, Oxaliplatin, and Paclitaxel) in Pediatric and Adult Patients with Refractory or Recurrent Central Nervous System (CNS) Germ Cell Tumors (GCT): The International CNS GCT Consortium Trial, CNS GCT–4

Jonathan Finlay

Biologically-Based Therapeutics for the Treatment of Diffuse Intrinsic Pontine Gliomas

Nalin Gupta
Detailed Molecular Characterisation of Diffuse Intrinsic Pontine Gliomas Identifies Three Molecular Subgroups and a Novel Cancer Driver, ACVR1 ................................................. iii26
Cynthia Hawkins

Final Results of a Prospective Multi-Institutional Phase II Study of Everolimus (RAD001), an mTOR Inhibitor, in Pediatric Patients with Recurrent or Progressive Low-Grade Glioma. A POETIC Consortium Trial ................................................................. iii27
Mark Kieran

Potency of Secreting HCG-β in Germinomas: Clinical and Biological Analysis ........................................................................ iii27
Masato Matsutani

Prognostic Marker Analysis in Pediatric Posterior Fossa Ependymomas .................................................................................. iii27
Roger McClendon

Targeting Resistance Pathways in BRAF-Mutant Pediatric Gliomas ........................................................................ iii27
Theo Nicolaides

Intracranial Germ Cell Tumors with MTOR Mutation are Common in Basal Ganglia ........................................................... iii28
Ryo Nishikawa

Metastasis and Tumor Recurrence from Rare SOX9-positive Cells in MYCN-Driven Medulloblastoma ............................... iii28
Frederick Swartling

Long-term Outcome of Centrally Located Low-Grade Glioma in Children ............................................................................... iii28
Keita Terashima

High-Throughput Drug Screening Identifies HDAC Inhibitors as Candidate Therapeutics for MYC-Driven Medulloblastoma .... iii29
Rob Wechsler-Reya

C19MC OncomiRs Converge on Multiple Cell Cycle Regulators to Modulate Neural Differentiation and the Tumor Epigenome ...... iii29
Annie Huang

Highly Selective Intra-Arterial Chemotherapy for the Treatment of Progressive Diffuse Intrinsic Pontine Gliomas (DIPG) ........ iii29
Kenneth Cohen

KIAA1549:BRAF Fusion Gene in Pediatric Brain Tumors of Different Histogenesis ................................................................ iii29
Felice Giangaspero

Histopathologic Evaluation of H3K27me3 is a Prognostic Biomarker for Pediatric Glioblastomas ................................................. iii29
Alexander Judkins

Convection-Enhanced Delivery of Nimustine Hydrochloride for Brainstem Malignant Glioma: Current Study and Development of New Device ........................................................................ iii30
Ruta Saito

Quality of Life of Extremely Long-Time Survivors with Germinoma Mainly Treated with Radiotherapy ........................................ iii30
Kazuhiko Sugiyama

THOR Methylation Provides Insight into the Telomere Maintenance Landscape of Malignant Gliomas ........................................ iii30
Uri Tabori

Histone Deacetylase Inhibitor PCI-24781 Shows Antiproliferative Effects Against Pediatric Glioblastoma Cells ......................... iii30
Elvis Valera

mTOR Kinase Inhibitors and Apoptosis in Glioblastoma ............................................................................................................. iii31
William Weiss

Optimization of Demethylating Therapy for IDH1 Mutant Gliomas .......................................................................................... iii31
Greg Riggins

Identifying Drug Compounds Targeting Tumor Metabolism in Glioblastomas ........................................................................ iii31
Gelareh Zadeh

A c-Met-β1 Integrin Complex Drives Invasive Resistance to Anti-Angiogenic Therapy ................................................................. iii31
Manish Aghi

Mapping the Glioblastoma Metabolome after Bevacizumab Therapy by 13C6-Glucose Metabolomic Flux Analysis ................ iii32
Rolf Bjerkvig

High-throughput Screening of Glioma Stem Cell Lines for Drug Structure and Genotype-Correlated Sensitivity to a Panel of Tyrosine Kinase Inhibitors ................................................................ iii32
John de Groot

High Interstitial Fluid Pressure Regulates Tumor Growth and Drug Uptake in Human Glioblastoma ............................................. iii32
Anders Persson

Mutant IDH1-Driven Cellular Transformation Increases Rad51-Mediated Homologous Recombination and Temozolomide (TMZ) Resistance .................................................................................................. iii33
Russell Pieper
